

STAGIDIP QA GUIDE (NON-TECHNICAL / MANUAL TEST)

This version is for QA who do **not** read code.

Use this like a checklist: open page -> click button -> compare result.

A. Before Testing (Very Important)

1. Ask developer/admin for:
 - URL website (example: `http://localhost:3000`)
 - 1 valid login account
 - 1 invalid login account (or wrong password)
2. Open browser in Incognito.
3. Login page must open.

If login page cannot open, stop and report: **"Environment not ready"**.

B. Simple Test Result Format

For each test case, mark

- ☒ PASS = result same as expected
- ☒ FAIL = result not same as expected
- ☐ BLOCKED = cannot test (data/access/environment missing)

Template:

Test ID	Page	Result	Evidence (Screenshot Name)	Notes
AUTH-01	Login	☒ PASS	auth-01.png	-

C. CORE FLOW (Do this first)

AUTH MODULE

AUTH-01 — Open protected page without login

- Step:
 1. In incognito, open `/dashboard` directly.
- Expected:
 - Automatically redirected to `/login`.

AUTH-02 — Login with valid account

- Step:
 1. Open `/login`.
 2. Input valid email + password.
 3. Click **Sign in**.
- Expected:
 - Go to Dashboard page.
 - Sidebar menu visible.

AUTH-03 — Login with wrong password

- Step:
 1. Logout first (if still logged in).
 2. Input valid email + wrong password.
- Expected:
 - Error message shown.
 - Stay on login page.

AUTH-04 — Logout

- Step:
 1. Click **Logout** button.
 2. Open `/dashboard` again.
- Expected:
 - Redirect back to login.

D. MENU-BY-MENU MANUAL TEST (NO CODE)

Rule for every data table page:

1. Page loads
2. Search works
3. Add/Edit/Delete (if button exists)
4. Success/error message appears
5. Data updates in table

1) Dashboard

- Open: Dashboard menu
- Check
 - Tab can be changed
 - No blank white screen
 - No crash error

2) Registration Menu

Open each submenu below and repeat table rule:

- Purchase Order (registration)
- Types
- Models
- User Management
- Detail Part Number
- Detail Specification
- Detail Prestaging
- Detail Preloading
- Setting Pre Staging
- Warehouse
- Batch
- Customer
- Status PO
- Style

Special for **User Management**:

- Verify role filter works.
- Verify status filter works.

Special for **Batch**:

- Check popup modal Add/Edit can open and close.

3) Specification

- Open Specification menu.
- Verify table loads and search works.

4) Staging Registration (Purchase Order)

- Open Staging Registration menu.
- Verify:
 - Search works
 - Status filter works
 - Pagination works

5) Pre Staging

- Open Pre Staging Checklist.
- Verify list shows data (or proper empty message).

6) Staging

Test pages:

- Staging New Machine
- Staging Old Machine
- Pre Loading Inspection

Check each page:

- Table loads
- No crash
- If export button exists, export works

7) Status Delivery

- Open Status Delivery.
- If Add/Edit/Delete available, test all 3 actions.

8) Warehouse

- Open Warehouse Transfer.
- Verify date fields can be input and saved.
- Verify list updates after save.
- Open Delivery Request (from warehouse/summary link).
- Verify page opens and data visible.

9) Summary

Open each summary page and verify it opens normally:

- Summary Machine
- Summary Accessories
- Summary New Machine
- Summary Old Machine
- Summary Warehouse Transfer
- Summary Warehouse
- Summary Pre Staging
- Duration Staging Summary
- Duration Report Summary
- Development Summary
- Summary Status Delivery
- Summary UPS
- Implementation Table

10) My Datindo Integration

- Open My Datindo Integration.
- Verify table appears and no crash.

E. Alias URL Test (Important)

Copy URL below one-by-one in browser, expected redirect to right page:

Open URL	Must redirect to
/statusDelivery	/status-delivery
/warehouseTransfer	/warehouse-transfer
/viewNewMachine	/staging/new-machine
/viewOldMachine	/staging/old-machine
/porcaheOrder	/purchase-order

If not redirected correctly, mark FAIL.

F. Bug Report Format (for QA)

Use this simple format for every bug:

1. **Title:** short bug title
2. **Page/Menu:** where issue happened
3. **Steps:**
 - Step 1
 - Step 2
4. **Actual Result:** what happened
5. **Expected Result:** what should happen
6. **Evidence:** screenshot/video
7. **Severity:** High / Medium / Low

G. Final Sign-off (Simple)

Area	PASS FAIL BLOCKED Notes
Auth	
Dashboard	
Registration	
Specification	
Staging	
Status Delivery	
Warehouse	
Summary	
Integration	

Final decision:

- ☐ READY FOR UAT
- ☐ READY WITH MINOR FIX
- ☐ NOT READY
